Response Rates

Household	Number	Response rates
Sampled	64,400	99
Occupied	61,602	
Interviewed	61,242	

Women age 15-49

Eligible for interview	68,711	94
Interviewed	64,378	

Children under 5

Eligible for interview	24,686	94
Mothers/Caretakers interviewed	23,099	

Children age 5-17

Eligible for interview	40,617	97
Mothers/Caretakers interviewed	39,386	

Survey Implementation

Implementing agency:
Bangladesh Bureau of Statistics

Sampling frame:
2011 and Bangladesh population and housing census sample frame

Listing & mapping:
October - December 2018

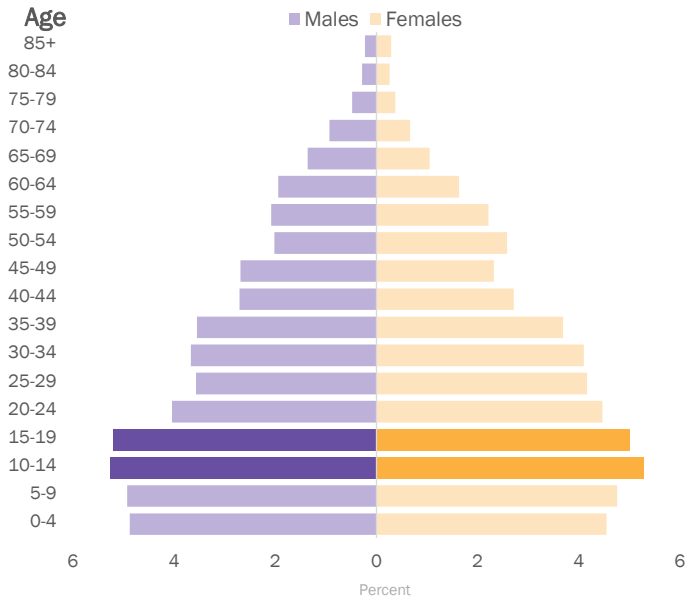
Interviewer training:
12 December 2018 – 16 January 2019

Fieldwork:
19 January – 1 June 2019

Questionnaires:
Household
Women age 15-49
Children under 5
Children age 5-17
Water quality testing

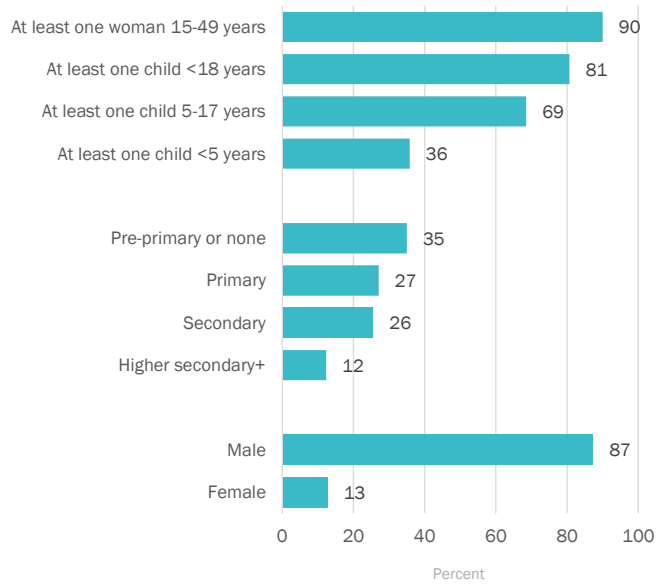
Population Characteristics

Household Population Age & Sex Distribution



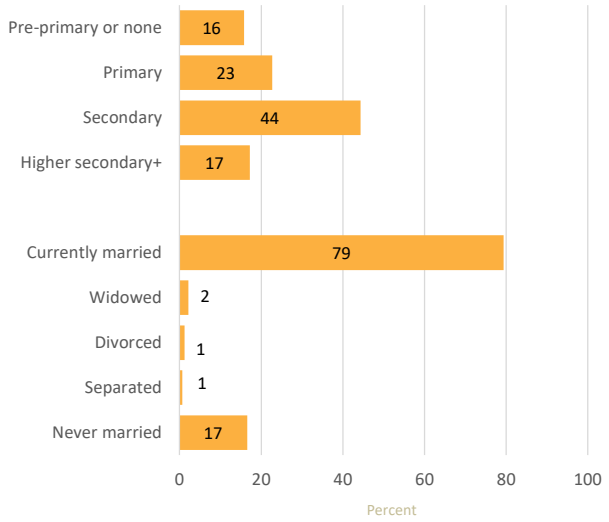
Percent distribution of household population by age group and sex

Household Composition & Characteristics of Head of household



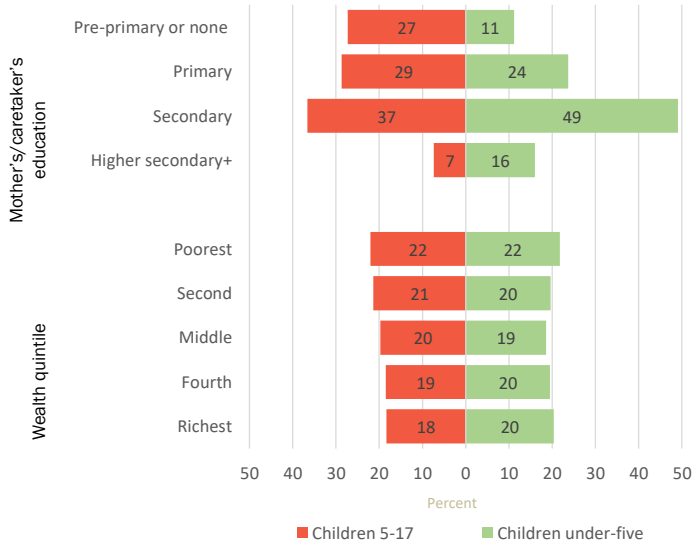
Percent of households by selected characteristics

Women's Profile



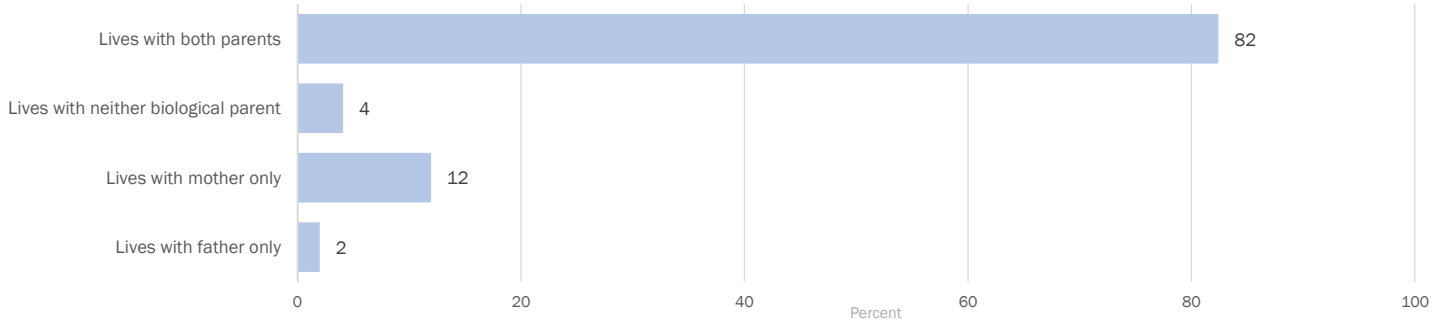
Percent distribution of women age 15-49 by background characteristics

Children's Profile



Percent distribution of children age 5-17 and under-five by background characteristics

Children's Living Arrangements*



Percent distribution of children age 0-17 years according to living arrangements
*Children age 0-17 years

Divisional Distribution of Population (percent)

Division	Households	Women	Children under 5	Children 5-17
National	100	100	100	100
Barishal	6	5	6	6
Chattogram	18	20	22	22
Dhaka	25	25	24	23
Khulna	12	12	10	10
Mymensingh	7	7	7	7
Rajshahi	14	13	12	12
Rangpur	12	11	11	11
Sylhet	6	7	8	9

Key Messages

- For this MICS, 64,400 households from sixty-four districts were sampled. Of these, 61,242 households interviewed for an overall response rate of 99%.
- Altogether, 68, 711 women between the ages of 15-49 years were eligible for the survey. Of them, 64,378 completed the interview, for a response rate of 94%.
- Mothers/caretakers of 23,099 children below the age of 5 years and mothers/caretakers of 39,386 children between 5-17 years of age were interviewed. These children represent 94% (n=24,686) of eligible children under the age of 5 years and 97% (n=40,617) of eligible children 5-17 years of age.
- Seventy-nine percent of women 15-49 years of age who were eligible for the survey were married, 17% were never married and 4% were widowed, divorced or separated. Data related to fertility, maternal and newborn health, postnatal health checks, contraception and maternal morbidity and family planning were collected from women who were ever married (currently married, widowed, divorced, separated). Data related to background characteristics, mass media and ICT habits, marital status, attitudes towards domestic violence, victimization, adult functioning, HIV status and life satisfaction were asked of all women 15-49 years of age.
- Eighty-seven percent of households in this MICS survey were headed by a male. Almost all households (90%) had at least one woman 15-49 years of age; 69% of households had a child 5-17 years of age; and 36% had a child under five years of age.

The Bangladesh Multiple Indicator Cluster Survey (MICS) was carried out in 2019 by the Bangladesh Bureau of Statistics (BBS) as part of the global MICS programme. Technical and financial support was provided by the United Nations Children's Fund (UNICEF).

The objective of this snapshot is to disseminate selected findings from the Bangladesh MICS 2019 related to Survey and Sample Characteristics. Data from this snapshot can be found in table SR. 1.1, SR.5.1, SR. SR.5.2, SR.5.3 and SR.2.3 in the Survey Findings Report.

Further statistical snapshots and the Survey Findings Report for this and other surveys are available on mics.unicef.org/surveys.
