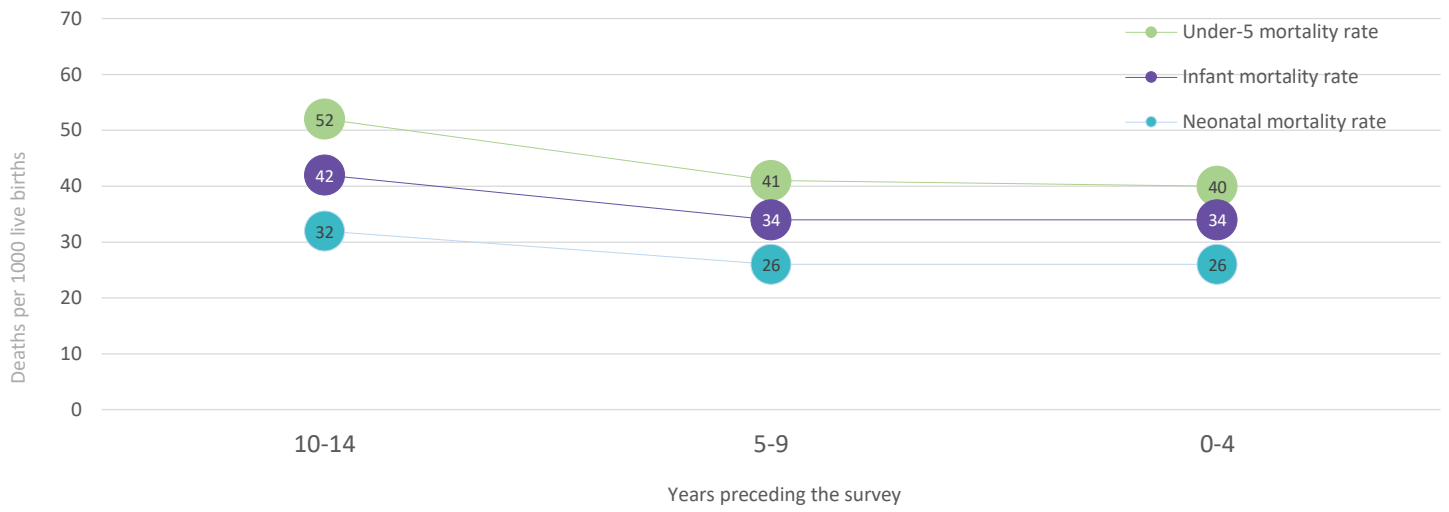
Bangladesh 2019

Child Mortality

Multiple Indicator Cluster Surveys

Mortality Rates among Children Under-5



Years preceding the survey	Neonatal mortality rate: SDG 3.2.2	Post-neonatal mortality rate	Infant mortality rate	Child mortality rate	Under-5 mortality rate: SDG 3.2.1
0-4	26	8	34	6	40
5-9	26	8	34	8	41
10-14	32	11	42	10	52

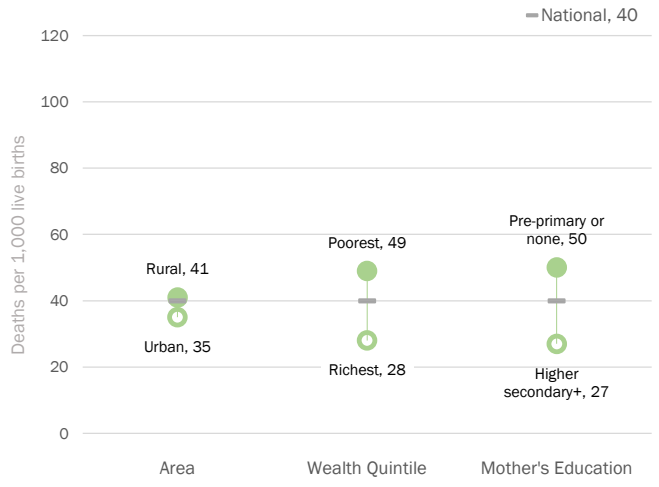
Neonatal mortality (NN): probability of dying within the first month of life
Post-neonatal mortality: calculated as difference between infant and neonatal mortality rates
Infant mortality ($_1q_0$): probability of dying between birth and first birthday
Child mortality ($_4q_1$): probability of dying between the first and fifth birthdays
Under-5 mortality ($_5q_0$): probability of dying between birth and fifth birthday

Key Messages

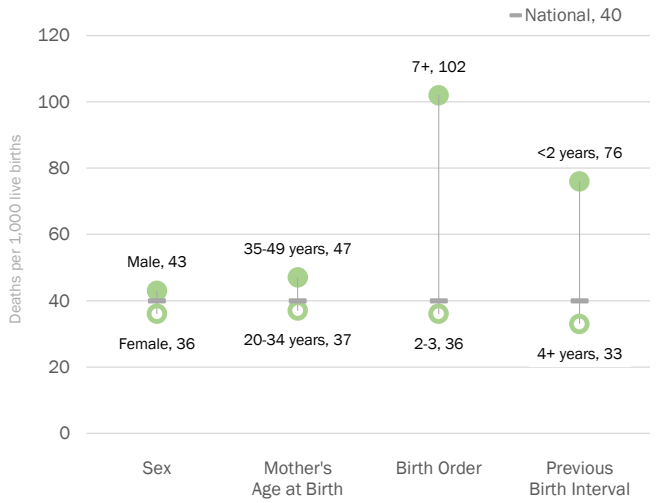
- Over time, the under-five mortality rate, infant mortality rate, and neonatal mortality rate in Bangladesh have all declined, although this decline has been slow or stagnant in the five years prior to the survey.
- In the five years prior to this MICS, the under-five mortality rate stood at 40 deaths per 1,000 live births, which is a reduction from 41 deaths per 1,000 live births in the 10 years prior to the survey and 52 deaths per 1,000 live births in the 15 years prior to the survey.
- In the five years prior to this MICS, the infant mortality rate has remained at 34 deaths per 1,000 live births, which is the same as what was reported in the 10 years prior to the survey. In the 15 years prior to the survey, the infant mortality rate was 52 deaths per 1,000 live births.
- In the five years prior to this MICS, the neonatal mortality rate stood at 26 deaths per 1,000 live births, which is the same as what was reported in the 10 years prior to the survey. In the 15 years prior to the survey, the neonatal mortality was 52 deaths per 1,000 live births.
- In Bangladesh, children from poor households or whose mothers/caretakers have a low level of education are likelier to die before their fifth birthday. The under-five mortality rate for children from the poorest households is 49 deaths per 1,000 live births compared to 28 deaths per 1,000 live births for children from the wealthiest households.
- Similarly, children whose mothers/caretakers have no education are nearly twice as likely (50 deaths per 1,000 live births) to die before their fifth birthday than children whose mothers/caretakers have higher secondary education (27 deaths per 1,000 live births).
- The under-five mortality rate (deaths per 1,000 live births) for the five year period preceding the survey is highest in Sylhet division at 61 deaths per 1,000 live births and lowest in Khulna division at 33 deaths per 1,000 live births. These data indicate a disparity between divisions in Bangladesh.

Child Mortality Disparities

Under-5 mortality rate by socio-economic characteristics & area (lowest vs highest)



Under-5 mortality rate by demographic risk factors (lowest vs highest)



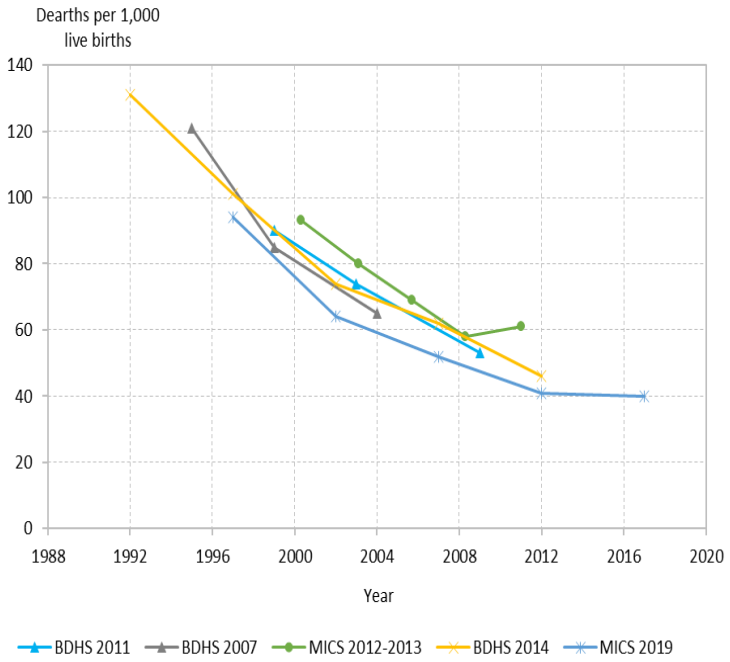
Under-five mortality rates for the five year periods preceding the survey, by socio-economic characteristics, area and demographic risk factors

Neonatal & under-5 mortality rates by division

Division	Neonatal mortality	Under-5 mortality
National	**26**	**40**
Barishal	22	36
Chattogram	25	41
Dhaka	22	35
Khulna	24	33
Mymensingh	25	36
Rajshahi	29	37
Rangpur	28	45
Sylhet	40	61

Neonatal mortality and under-5 mortality rates (deaths per 1,000 live births) for the five year periods preceding the survey, by division

Trends in under-5 mortality rates



The Bangladesh Multiple Indicator Cluster Survey (MICS) was carried out in 2019 by the Bangladesh Bureau of Statistics as part of the global MICS programme. Technical and financial support was also provided by the United Nations Children's Fund (UNICEF).

The objective of this snapshot is to disseminate selected findings from the Bangladesh MICS 2019 related to Child Mortality. Data from this snapshot can be found in table CS.1, CS2, and CS3 in the Survey Findings Report.

Further statistical snapshots and the Survey Findings Report for this and other surveys are available on mics.unicef.org/surveys.
